

ComboBox

object

Utils.UI.Controls.DropDownList

```
graph BT; DropDownList[Utils.UI.Controls.DropDownList] --> ComboBox[ComboBox]; DropDownList --> object[object];
```

The diagram illustrates a class hierarchy where 'Utils.UI.Controls.DropDownList' is the base class. Two arrows originate from its top edge: one points to the 'ComboBox' class box on the left, and the other points to the 'object' class box on the right. This indicates that 'DropDownList' inherits from both 'ComboBox' and 'object'.
